

Revealr.ai User Guide

Home

What is the Home page?

After you log in, you land on the Home page. From here you can open any part of the Console in two ways: the left navigation (sidebar) or the dashboard tiles on the main area. This section explains how to use both.

Home Dashboard

How to use the dashboard tiles

The Home page shows tiles for each main area (Documents, Upload, Relationships, Related Content, Analytics, Glossaries, etc.). Use them to jump straight to a section.

Step by step:

Left Navigation

How to use the left navigation

The left sidebar lists all main sections. You can expand a section to see its sub-pages, then click a page to open it.

Step by step:

Sections you may see: Home, Documents (Document Management, Upload Documents), Relationships (Document/Section/Relationship Mapping), Related Content (Content List, Content Relationships), Analytics, Glossaries (Glossary List, Glossary Relationships), Revealr AI, User Management, Settings (Document & Website), Assistance (Help, User Guide, User Comments).

Documents

What is the Documents section?

The Documents area is where you manage everything in your Revealr library:

Document Management

lets you browse, search, and edit documents;

Upload Documents

lets you add new files (one at a time, from your computer, from SharePoint, or in bulk). After upload, each document is converted automatically for web viewing.

Documents are converted after upload (validation, PDF creation, web format, tagging). You can preview and then publish when ready.

Document Management

How to find and browse documents

Use Document Management to see all documents and narrow down the list with search and filters.

To find and browse documents:

- Use the **search bar** at the top to type keywords and locate specific documents.
- Apply **filters** (e.g., Status, Has Previous Versions) to narrow results.
- Browse the list by document title, source, or hierarchy level.
- Click the **checkbox** to select documents for actions like export or delete.
- Use the **pagination controls** at the bottom to navigate through pages of documents.
- Switch to **Cards view** for a visual layout if preferred.

The screenshot displays the Revealr Document Management interface. On the left is a dark sidebar with navigation links: Home, Documents, Document Management (highlighted), Upload Documents, Relationships, Related Content, Analytics, Glossaries, Reveal AI, User Management, Settings, and Assistance. The main content area is titled 'Document Management' and includes a '+ UPLOAD DOCUMENTS' button. Below this is a filter bar with 'Filter by:' and buttons for 'Status' and 'Has Previous Versions', followed by a search bar. A table lists documents with columns: Document Title, Source Repository, LevelOne, LevelTwo, LevelThree, LevelFour, Version, and Ver. Two documents are selected, indicated by checkboxes and a yellow background. The 'Actions' bar at the bottom shows '2 Documents selected', 'Remove Selected', and 'Clear' buttons, with a red arrow pointing to the 'Actions' label.
